

ImPACT Administrators Information Course

Name:

Organization:

T F The best way to prevent problems with a concussion is to manage them effectively when they occur.

T F An athlete can return to play even while still experiencing symptoms of a concussion.

T F Second impact syndrome only occurs with a significant second blow when athlete returns to competition before resolution of symptoms.

T F CAT scan and MRIs are not sensitive to subtleties of concussions since they study structures and not function or physiological changes of the brain.

T F The test will begin after the completion of the "Current Symptoms" screens.

List 5 signs/symptoms of concussions or post-concussion syndrome:

Minimum interval between baseline tests is: _____

Must use _____ to administer the test, not laptop touch-pad.

Test administrators should take the test a minimum of _____ times to become familiar with the test.

Module 1 evaluates:

Module 2 evaluates:

Module 3 evaluates:

Module 4 evaluates:

Module 5 evaluates:

Module 6 evaluates:

Please return this form for your instructions on how to administer baseline testing and your school code.
